Day 3/90: Kubernetes Ingress, Services & ClusterIP vs NodePort

Day 3 of 90 Days Cloud & DevOps! ☁️⚡

1. Ingress Controller

ClusterIP service label selectors match karke healthy Pod endpoints ko automatically dynamically track karti hai.

```
# LABEL SELECTOR
ClusterIP service label selectors match
करके healthy Pod endpoints को automatically
dynamically track करती है।
```

2. ClusterIP Service

Ingress controller ek single external domain se path based routing karke backend microservices ko dispatch karta hai.

```
# L7 DISPATCH
Ingress controller एक single external
domain से path based routing करके backend
microservices को dispatch करता है।
```
