Uber Architecture: Why Uber Dumped Postgres for Schemaless MySQL

Uber ne Postgres chodkar MySQL par shift kyu kiya? 🚗📊

1. High-Frequency Trip Updates

Postgres row update par har secondary index ko re-write karta tha jisse write amplification hundred times ho gayi.

```
# WRITE AMPLIFICATION
Postgres row update पर हर secondary index
को re-write करता था जिससे write amplification
hundred times हो गयी।
```

2. PostgreSQL Write Spike

MySQL InnoDB cluster ke upar Schemaless layer build karke unhone immutable append updates se pure data-center ko scale kiya.

```
# APPEND-ONLY SCALE
MySQL InnoDB cluster के ऊपर Schemaless
layer build करके उन्होंने immutable append
updates से पूरे data-center को scale किया।
```
