Day 4/90: PyTorch Tensors, CUDA Autograd & Backpropagation

Day 4 of 90 Days Data Science & AI! 📊⚡

1. PyTorch Tensor

Har math operation par PyTorch ek Directed Acyclic Graph memory mein record karta hai.

```
# DYNAMIC DAG
हर math operation पर PyTorch एक Directed Acyclic Graph memory में record करता है।
```

2. Computation Graph

backward call karte hi GPU chain rule se gradients compute karke weights optimize karta hai.

```
# CHAIN RULE GPU
backward call करते ही GPU chain rule से gradients compute करके weights optimize करता है।
```
