OOM KILLER

Linux Architecture: Cgroups v2 & The OOM Killer Secret

Jab production server ki RAM full ho jaati hai, toh Linux kernel sabse pehle kise maar deta hai? 🐧🚨

1. RAM Exhaustion Spike

Kernel har process ka oom score calculate karta hai jo memory usage aur cgroup limits par depend karta hai.

```
# BADNESS SCORE
Kernel हर process का oom score calculate करता है जो memory usage और cgroup limits पर depend करता है।
```

2. Cgroups v2 Controller

Sabse dangerous rogue process ko instant terminate karke kernel operating system ko crash hone se bacha leta hai.

```
# SYSTEM SALVATION
सबसे dangerous rogue process को instant terminate करके kernel operating system को crash होने से बचा लेता है।
```
